Specification Summary

Brand	Squire
Product type	Body Only

Product Description

The SQUIRE Stronghold Long Shackle Padlock Body is a high-security locking solution specifically designed to accommodate standard 45mm half Euro cylinders. This "body only" design allows you to easily integrate the padlock into an existing master key system or change the locking mechanism cost-effectively without replacing the entire padlock.

Constructed with a solid hardened steel body and a hardened boron alloy steel long shackle, these padlocks offer exceptional resistance against cutting, sawing, and physical attacks. An electrophoretic anti-corrosion finish provides outstanding weather resistance, ensuring reliable outdoor performance.

These padlocks are available in two sizes: a 55mm body width (CEN Grade 3, Security Rating CEN 4) and a 65mm body width (CEN Grade 5, Security Rating CEN 5). Both variants are Secured by Design approved. Please note that the CEN Grade applies to the padlock body itself and will be affected by your choice of half Euro cylinder.

Please select your preferred body width, clearance, and security rating from the options below to suit your specific requirements.

Technical Specifications

- **Brand:** Squire
- **Suits Product:** 45mm Half Euro Cylinders
- **Body Width:** 55mm or 65mm (please choose from the options below)
- **Body Thickness:** 25mm or 32mm (please choose from the options below)

Brand Profile

Squire

Squire (formally **Henry Squire & Sons Ltd**) is one of the UK's oldest lockmakers — a heritage brand best known for **serious padlocks and chain security**, especially in the motorcycle, commercial, and site-security world. Squire's own history traces the business back to **1780**, when **William Squire** began making locks in **Willenhall** (the Black Country's lockmaking capital). They even supplied locks to the **British Army during the Napoleonic Wars**, which is a wildly specific flex that basically translates to: "we've been thinking about forced entry since muskets were a performance upgrade."

Operationally, the trading entity behind the brand is **Henry Squire & Sons Limited.**

What Squire is known for

Squire's modern identity is anchored in **high-security padlocks** and matching **hardened chains / accessories**, with the flagship line being **Stronghold®**. Their own "About" page calls out products like the **Stronghold SS100cs** as an ultra-high-security production padlock (Squire describe it as the world's strongest production padlock — not subtle, but neither is a 1kg lump of hardened steel).

A good example of how the brand positions itself in real-world standards:

- The **Squire SS65CS Stronghold** is independently listed by **Sold Secure** with **CEN Grade 6** and a **Powered Cycle Gold** rating, alongside features like hardened components and weather resistance.
