Specification Summary

Brand	Squire
Product type	Body Only

Product Description

The SQUIRE Stronghold Open Shackle Padlock Body Only is a high-security locking solution designed specifically to accept Evva KIK-SS cylinder inserts. This purpose-built design allows for the quick, easy, and secure fitment of the cylinder with no drilling required. This makes it an incredibly cost-effective option, as the locking mechanism can be changed or rekeyed without the need to replace the entire padlock.

Constructed with a solid hardened steel body and a hardened boron alloy steel shackle, these padlocks offer exceptional physical protection. They feature a highly durable, corrosion-resistant electrophoretic dark blue finish, ensuring excellent weather resistance for demanding outdoor environments.

These padlock bodies are available in a range of sizes, with body widths of 50mm, 65mm, or 80mm, and security ratings spanning from CEN Grade 4 up to CEN Grade 6. Please choose your preferred size, shackle diameter, and security rating from the options below.

Technical Specifications

- **Body Width:** 50mm, 65mm, or 80mm (please choose from the options below)
- **Body Thickness:** 26mm, 31.8mm, or 40mm (please choose from the options below)
- **Shackle Diameter:** 10mm, 12.7mm, or 16mm (please choose from the options below)
- **Horizontal Clearance:** 22mm, 29.5mm, or 32mm (please choose from the options below)
- **Vertical Clearance:** 26mm, 29mm, or 32mm (please choose from the options below)
- **Security Rating:** CEN Grade 4, CEN Grade 5, or CEN Grade 6 (please choose from the options below)
- **Material:** Hardened Steel body with Hardened Boron Alloy Steel shackle
- **Finish:** Dark Blue electrophoretic finish
- **Compatibility:** Designed to suit Evva KIK-SS cylinder inserts
- **Weather Resistant:** Yes
- **Weight:** 434g, 969g, or 1.944kg (please choose from the options below)

Key Features

- **Cylinder Compatibility:** Purpose-designed for easy and secure fitment of Evva KIK-SS cylinders with no drilling required.
- **Cost-Effective Security:** Allows the locking mechanism to be changed or serviced without replacing the entire padlock body.
- **Master Key Integration:** Ideal for integrating high-security padlocks into an existing master key system.
- **Robust Construction:** Solid hardened steel body paired with a hardened boron alloy steel shackle for maximum attack resistance.
- **Corrosion Resistant:** Electrophoretic finish provides excellent weather protection, making it suitable for harsh outdoor environments.
- **Range of Sizes:** Available in multiple body widths and shackle diameters to suit your specific security requirements.

Brand Profile

Squire

Squire (formally **Henry Squire & Sons Ltd**) is one of the UK's oldest lockmakers — a heritage brand best known for **serious padlocks and chain security**, especially in the motorcycle, commercial, and site-security world. Squire's own history traces the business back to **1780**, when **William Squire** began making locks in **Willenhall** (the Black Country's lockmaking capital). They even supplied locks to the **British Army during the Napoleonic Wars**, which is a wildly specific flex that basically translates to: "we've been thinking about forced entry since muskets were a performance upgrade."

Operationally, the trading entity behind the brand is **Henry Squire & Sons Limited.**

What Squire is known for

Squire's modern identity is anchored in **high-security padlocks** and matching **hardened chains / accessories**, with the flagship line being **Stronghold®**. Their own "About" page calls out products like the **Stronghold SS100cs** as an ultra-high-security production padlock (Squire describe it as the world's strongest production padlock — not subtle, but neither is a 1kg lump of hardened steel).

A good example of how the brand positions itself in real-world standards:

- The **Squire SS65CS Stronghold** is independently listed by **Sold Secure** with **CEN Grade 6** and a **Powered Cycle Gold** rating, alongside features like hardened components and weather resistance.
