Specification Summary

Brand	Squire
Product type	Ground Anchor

Product Description

The Squire WA300 Wall Mounted Bridge Anchor is a robust and reliable security solution designed to provide a secure anchoring point for your valuable equipment. Constructed from solid 5mm hardened steel, this heavy-duty anchor is built to resist tampering and physical attacks, making it an excellent choice for safeguarding bikes, ladders, lawnmowers, and other outdoor gear.

With a clearance of 37mm x 31mm, the WA300 is compatible with most security chains up to an 8mm link diameter. It features a durable, weather-resistant blue powder-coated finish, making it equally suited for both indoor and outdoor applications, whether mounted in a garage, shed, or on an external wall.

Installation is straightforward, and the anchor is supplied complete with four security fixing bolts to ensure a permanent, tamper-resistant mount.

Technical Specifications

Brand Profile

Squire

Squire (formally **Henry Squire & Sons Ltd**) is one of the UK's oldest lockmakers — a heritage brand best known for **serious padlocks and chain security**, especially in the motorcycle, commercial, and site-security world. Squire's own history traces the business back to **1780**, when **William Squire** began making locks in **Willenhall** (the Black Country's lockmaking capital). They even supplied locks to the **British Army during the Napoleonic Wars**, which is a wildly specific flex that basically translates to: "we've been thinking about forced entry since muskets were a performance upgrade."

Operationally, the trading entity behind the brand is **Henry Squire & Sons Limited.**

What Squire is known for

Squire's modern identity is anchored in **high-security padlocks** and matching **hardened chains / accessories**, with the flagship line being **Stronghold®**. Their own "About" page calls out products like the **Stronghold SS100cs** as an ultra-high-security production padlock (Squire describe it as the world's strongest production padlock — not subtle, but neither is a 1kg lump of hardened steel).

A good example of how the brand positions itself in real-world standards:

- The **Squire SS65CS Stronghold** is independently listed by **Sold Secure** with **CEN Grade 6** and a **Powered Cycle Gold** rating, alongside features like hardened components and weather resistance.
