Specification Summary

Brand	Squire
Product type	Ground Anchor

Product Description

The Squire WA500 Wall Mounted Bridge Anchor (also known as the Squire Summit WA500) is a robust and reliable security solution designed to provide a secure anchoring point for your valuable equipment. Crafted from 5mm thick hardened steel, this heavy-duty anchor is ideal for securing bicycles, ladders, lawnmowers, and other garden tools in sheds, garages, or outdoor areas.

With a durable, weather-resistant blue powder-coated finish, the WA500 is built to withstand both indoor and outdoor environments. It features a generous 58mm x 43mm clearance, making it compatible with most security chains up to a 10mm link diameter.

The anchor is easy to install and comes complete with four high-security fixing bolts. These security fittings include tamper-proof steel ball inserts that are hammered into the bolt heads after installation, preventing unauthorised removal and ensuring a permanent, high-security mount. It is Sold Secure Gold (Bicycle) rated and Secured by Design accredited, offering peace of mind against dedicated physical attacks.

Technical Specifications

- **Brand:** Squire
- **Model:** WA500 (Summit)
- **Material:** Hardened Steel (5mm thickness)
- **Finish:** Blue powder-coated
- **Width:** 283mm
- **Depth:** 77mm

Brand Profile

Squire

Squire (formally **Henry Squire & Sons Ltd**) is one of the UK's oldest lockmakers — a heritage brand best known for **serious padlocks and chain security**, especially in the motorcycle, commercial, and site-security world. Squire's own history traces the business back to **1780**, when **William Squire** began making locks in **Willenhall** (the Black Country's lockmaking capital). They even supplied locks to the **British Army during the Napoleonic Wars**, which is a wildly specific flex that basically translates to: "we've been thinking about forced entry since muskets were a performance upgrade."

Operationally, the trading entity behind the brand is **Henry Squire & Sons Limited.**

What Squire is known for

Squire's modern identity is anchored in **high-security padlocks** and matching **hardened chains / accessories**, with the flagship line being **Stronghold®**. Their own "About" page calls out products like the **Stronghold SS100cs** as an ultra-high-security production padlock (Squire describe it as the world's strongest production padlock — not subtle, but neither is a 1kg lump of hardened steel).

A good example of how the brand positions itself in real-world standards:

- The **Squire SS65CS Stronghold** is independently listed by **Sold Secure** with **CEN Grade 6** and a **Powered Cycle Gold** rating, alongside features like hardened components and weather resistance.
