Specification Summary

Brand	Tessi
Product type	Bullet Locks

Product Description

The Tessi 6460 Oval Bullet Lock is designed to suit the most popular styles of roller shutters, providing robust security for commercial and industrial premises. Typically, the lock housings are welded to either side of the shutter frame, allowing the tail of the bullet lock to be inserted directly into a hole in the roller door. This securely pins the door in place, preventing it from being pried or rolled open.

For maximum security and convenience, the key is only removable when the lock is in the fully locked position, ensuring the shutter is never left inadvertently unlocked.

This versatile bullet lock is available in multiple configurations to suit your specific installation needs. Depending on your requirements, you can select a single bullet lock or a keyed-alike pair complete with housings. Please choose your preferred pack quantity, keying option, weight, and barcode from the options below.

Brand Profile

Tessi

TESSI is a trade security brand best known as a **supplier of roller shutter locks**—the practical, site-proven stuff used on **roller shutters, gates, and similar metal closures** where you want a straightforward mechanical lock that's easy to fit, easy to replace, and hard to "accidentally" defeat with a big screwdriver and confidence.

Aldridge describes TESSI as having products **used in the industry for over 20 years**, with a range of shutter locks to suit multiple applications.

What TESSI is known for (the stuff you actually see on shelves)

- **Centre shutter locks** (e.g., the **6410** pattern), typically a compact lock body that throws locking arms/bolts across the shutter/gate.
- **Bullet shutter locks** in common formats like **oval and round-faced** models (e.g., **6460/6461**), designed so the "bullet" tail engages into the shutter/door to prevent opening.
- **Genuine key blanks** for the matching lock families (6410/6430/6460/6461 and cruciform variants like 6440).
