Product Description

The TrioVing 2214 internal door lock is a reliable, high-quality lockcase designed for light interior doors. This model features a 55mm backset and serves as the 55mm version of the popular Boda 2014 lockcase.

While most domestic homes are fitted with the standard Boda 2014 lockcase, it is essential to measure your door before purchasing to ensure a perfect fit. Simply measure the distance from the edge of the door to the centre of the keyhole; if this measurement is 55mm, the TrioVing 2214 is the correct replacement for your door.

This versatile lockcase is fully reversible, allowing it to be easily configured for both left and right-handed doors by pulling out the latch and rotating it 180 degrees. It is suitable for use with either a standard key function or a bathroom thumbturn. Constructed with a durable grey lacquered steel body, it provides reliable, long-lasting operation for internal doors.

Technical Specifications

- **Manufacturer:** TrioVing
- **Backset:** 55mm
- **Lockcase Material:** Grey lacquered steel
- **Handing:** Reversible (suitable for left or right-hand doors)

- **Application:** Light internal doors
- **Function:** Latch and deadbolt (key or bathroom thumbturn operation)

Key Features

Brand Profile

TrioVing

TrioVing is a Norwegian lock and door-hardware brand with deep roots in Scandinavia's "make it survive winter and humans" engineering tradition. The modern TrioVing name comes from a series of mergers in Norway's lock industry: **TRIO** was formed in **1904** by the merger of three lock/fittings companies, **VING** formed in **1950**, and the two combined in **1971** to create **TrioVing A/S**, which became Norway's leading lock company.

In **1983**, Finland's **Abloy** entered the Norwegian market by acquiring **TrioVing's Locks and Security** (along with VingCard's hotel security business), pulling TrioVing into the broader Nordic consolidation story that eventually became ASSA ABLOY.

What TrioVing is especially known for today is robust, **Scandinavian-style lockcases and hardware**—including **stainless steel mortice lockcases** that show up in **high-end Scandinavian doors** and **marine applications**, where corrosion resistance isn't a "nice to have," it's the entire point.
