Product Description

The TrioVing 5316 Full Lockset is a complete, high-quality locking solution designed for heavy-use doors, commonly found in demanding marine, offshore, and Scandinavian door applications. This comprehensive kit provides everything required to secure your door, featuring a durable 5316 lock case that is fully reversible (left or right-handed) and can be easily swapped on-site to suit your door's opening direction.

Crafted for reliability in harsh environments, the lockset comes complete with stylish 7363 satin steel lever handles, a 5520 external cylinder supplied with three keys, a 5541 internal thumbturn for convenient locking from the inside, and 8660 long plate escutcheons. This setup provides a perfect blend of robust security, smooth mechanical operation, and a clean, modern aesthetic.

An optional 5935 strike plate is also available to complete your installation.

Technical Specifications

- **Lock Case:** TrioVing 5316 (reversible on-site for left or right-hand doors)
- **Handles:** TrioVing 7363 satin steel lever handles
- **External Cylinder:** TrioVing 5520 cylinder

Brand Profile

TrioVing

TrioVing is a Norwegian lock and door-hardware brand with deep roots in Scandinavia's "make it survive winter and humans" engineering tradition. The modern TrioVing name comes from a series of mergers in Norway's lock industry: **TRIO** was formed in **1904** by the merger of three lock/fittings companies, **VING** formed in **1950**, and the two combined in **1971** to create **TrioVing A/S**, which became Norway's leading lock company.

In **1983**, Finland's **Abloy** entered the Norwegian market by acquiring **TrioVing's Locks and Security** (along with VingCard's hotel security business), pulling TrioVing into the broader Nordic consolidation story that eventually became ASSA ABLOY.

What TrioVing is especially known for today is robust, **Scandinavian-style lockcases and hardware**—including **stainless steel mortice lockcases** that show up in **high-end Scandinavian doors** and **marine applications**, where corrosion resistance isn't a "nice to have," it's the entire point.
