Specification Summary

Brand	TrioVing
Product type	TrioVing Shop

Product Description

The TrioVing 5506/39 is a premium half Euro profile cylinder (often referred to as a single Euro cylinder) designed for lock cases that require a continental-style profile, such as DIN standard locks. With a length of 39mm, this single-sided cylinder is ideal for doors and applications where key access is only required from one side, such as garages, panic locks, and switch boxes.

This cylinder is designed to integrate seamlessly into a TrioVing Master Key System, allowing you to manage multiple locks under a unified keying structure. Each cylinder is supplied with three keys as standard.

The TrioVing 5506/39 is a special-order item available in both Satin Chrome and Satin Brass finishes. If you require custom keying options, such as keying alike or master keying, or if you would like to check current lead times, please email our team for further details and pricing.

Technical Specifications

- **Brand:** TrioVing
- **Cylinder Type:** Half Euro Profile (Single)
- **Length:** 39mm
- **Finishes:** Satin Chrome, Satin Brass
- **Keys Supplied:** 3 keys per lock

Brand Profile

TrioVing

TrioVing is a Norwegian lock and door-hardware brand with deep roots in Scandinavia's "make it survive winter and humans" engineering tradition. The modern TrioVing name comes from a series of mergers in Norway's lock industry: **TRIO** was formed in **1904** by the merger of three lock/fittings companies, **VING** formed in **1950**, and the two combined in **1971** to create **TrioVing A/S**, which became Norway's leading lock company.

In **1983**, Finland's **Abloy** entered the Norwegian market by acquiring **TrioVing's Locks and Security** (along with VingCard's hotel security business), pulling TrioVing into the broader Nordic consolidation story that eventually became ASSA ABLOY.

What TrioVing is especially known for today is robust, **Scandinavian-style lockcases and hardware**—including **stainless steel mortice lockcases** that show up in **high-end Scandinavian doors** and **marine applications**, where corrosion resistance isn't a "nice to have," it's the entire point.
