Product Description

Get your replacement TrioVing D12 keys cut to code quickly and securely. The TrioVing D12 is a high-security 12-pin key system designed for TrioVing Scandinavian Oval style cylinders, which are widely used on high-quality doors and marine applications.

Our professional key cutting service uses genuine TrioVing Assa Abloy blanks to ensure a perfect, reliable fit every time. To order, simply locate the 6-letter code stamped on the head of your existing key (for example, GQWBPT) and enter it into the code box before selecting your required quantity. Please ensure your key is embossed with the

'TrioVing' Assa Abloy branding before ordering.

For your peace of mind and enhanced security, all keys are shipped discreetly without any customer details or address information inside the packaging. We also highly recommend having your keys delivered to an alternative address, such as your workplace or a family member's home, rather than the location where the locks are installed.

Technical Specifications

- **Key Type:** High-security 12-pin key
- **Key Blank:** Genuine TrioVing Assa Abloy blanks
- **Code Format:** 6 letters (e.g., GQWBPT)

Brand Profile

TrioVing

TrioVing is a Norwegian lock and door-hardware brand with deep roots in Scandinavia's "make it survive winter and humans" engineering tradition. The modern TrioVing name comes from a series of mergers in Norway's lock industry: **TRIO** was formed in **1904** by the merger of three lock/fittings companies, **VING** formed in **1950**, and the two combined in **1971** to create **TrioVing A/S**, which became Norway's leading lock company.

In **1983**, Finland's **Abloy** entered the Norwegian market by acquiring **TrioVing's Locks and Security** (along with VingCard's hotel security business), pulling TrioVing into the broader Nordic consolidation story that eventually became ASSA ABLOY.

What TrioVing is especially known for today is robust, **Scandinavian-style lockcases and hardware**—including **stainless steel mortice lockcases** that show up in **high-end Scandinavian doors** and **marine applications**, where corrosion resistance isn't a "nice to have," it's the entire point.
