Specification Summary

Brand	TrioVing
Product type	TrioVing Shop
Keyway	TrioVing 2014

Product Description

The TrioVing Boda 2014 is a high-quality, zinc-plated lock case designed for internal doors and bathroom or toilet doors. It is the direct replacement for the now-obsolete TrioVing 2022 lock case. While it is identical in size and function to the 2022, the 2014 features a non-handed design, meaning you no longer need to worry about left- or right-hand configurations during installation.

Reversing the latch is simple: just pull the latch out, rotate it 180 degrees, and release it. The lock can be operated by a standard lever handle and locked using either the included key or a compatible toilet thumbturn.

Please note that this lock case is supplied in a modern silver finish (replacing the older brass finish) and includes one keep and one key. All TrioVing 2014 locks are keyed alike and share the same key profile. If you require an internal lock with unique keys for added privacy or security, we recommend selecting the TrioVing 2011 lock case instead.

Technical Specifications

- **Manufacturer:** TrioVing

Brand Profile

TrioVing

TrioVing is a Norwegian lock and door-hardware brand with deep roots in Scandinavia's "make it survive winter and humans" engineering tradition. The modern TrioVing name comes from a series of mergers in Norway's lock industry: **TRIO** was formed in **1904** by the merger of three lock/fittings companies, **VING** formed in **1950**, and the two combined in **1971** to create **TrioVing A/S**, which became Norway's leading lock company.

In **1983**, Finland's **Abloy** entered the Norwegian market by acquiring **TrioVing's Locks and Security** (along with VingCard's hotel security business), pulling TrioVing into the broader Nordic consolidation story that eventually became ASSA ABLOY.

What TrioVing is especially known for today is robust, **Scandinavian-style lockcases and hardware**—including **stainless steel mortice lockcases** that show up in **high-end Scandinavian doors** and **marine applications**, where corrosion resistance isn't a "nice to have," it's the entire point.
