Specification Summary

Brand	Union C-Series
Product type	Detainer

Product Description

The UNION C-Series 3G135 (formerly known as Chubb) 'Fortress' Detainer Mortice Deadlock is a heavy-duty, high-security deadlock designed for timber doors up to 50mm thick. Renowned for its robust construction, this 5-detainer lock offers exceptional resistance against forced entry, drilling, picking, and sawing.

The lock features a solid brass deadbolt with a 14mm throw, reinforced with hardened steel rollers to prevent hacksaw attacks. It is supplied complete with matching escutcheons and three keys featuring a unique, high-security cranked bitting design. This special key profile is exclusive to the UNION C-Series, providing enhanced key control.

For added versatility, the 3G135 is approved under EN1634-1 for use on 60-minute timber fire doors, making it suitable for both commercial and residential applications. Please note that this model is not interchangeable with other detainer range locks. A double pole micro-switch version is also available to special order for integration with alarm systems.
