Specification Summary

Brand	Walsall Locks
Product type	Lever

Product Description

The Walsall Locks W2000 5 Lever High Security Padlock is a robust, heavy-duty locking solution designed to offer exceptional physical protection and weather resistance. Ideal for medium to high-security applications such as securing gates, warehouses, and containers, this padlock features a laminated steel rim body that has been rust-proofed with a specialised 'Sheraplex Black' finish.

Engineered with security in mind, the W2000 is equipped with a 5-lever mechanism offering up to 2,500 key combinations. It boasts a stainless steel bolt and brass levers, both featuring advanced anti-pick protection. Physical attacks are thwarted by the heavy-duty, black chrome-plated hardened steel shackle and stainless steel outer body plates. Additionally, a black chrome-plated steel keyhole cover protects the internal mechanism from dust, debris, and moisture.

This padlock is available in both Keyed Alike and Keyed to Differ options, making it suitable for single-point security or multi-lock suites. Please select your preferred keying option and reference from the options below.
