Specification Summary

Brand	Willenhall Locks
Product type	5 Lever

Product Description

The Willenhall Locks G14 is a robust, high-quality 5-lever hook bolt gatelock designed to provide reliable security for external gates. This heavy-duty lock features a highly practical dual-operation design: the hook bolt is easily released using a convenient thumb trigger from either side of the gate, allowing for quick and easy day-to-day access. When full security is required, the hook bolt can be securely deadlocked using the key from either side.

Constructed with a durable satin brass finish, the G14 is built to withstand outdoor environments while maintaining a classic, professional appearance. It features a 53mm backset and a 96mm case depth, making it suitable for a wide range of gate installations. The lock is supplied keyed to differ with two keys as standard, offering up to 100 differs. For bespoke security setups, keyed alike (KA) and master keyed (MK) options are available as a special order.

Whether you are securing a residential garden gate or a commercial perimeter, the Willenhall G14 offers an ideal blend of convenient trigger operation and robust 5-lever deadlocking security.

Technical Specifications

- **Brand:** Willenhall Locks
- **Manufacturer Reference:** G14
- **Mechanism:** 5 Lever
- **Backset:** 53mm
- **Case Depth:** 96mm
- **Case Height:** 101mm

Brand Profile

Willenhall Locks

Willenhall Locks is a trade-familiar UK lock brand built around the classic **mortice lock** lineup: **5-lever deadlocks**, **sashlocks**, and a handful of **specialist cases** for awkward door types (plus some gate kit). The branding leans into Willenhall's identity as the historic heartland of British lockmaking, and retailers commonly describe the range as being supplied for **50+ years**.

What you typically see under the Willenhall name:

- **Mortice deadlocks & sashlocks** (often 5-lever) for domestic/commercial doors.
- **Narrow-stile / euro sashcases** for glazed and French doors (e.g. the **EP1 Euro Sashcase**, which is explicitly pitched as a narrow-stile solution).
- **Gate locks** using **hook bolt** formats (Aldridge lists models like **G10 / G14 / G17** as 5-lever gate locks).
- Some sellers also group in **slamlock**-type products under the Willenhall label (auto-locking on close—great for security, occasionally *too* great if you enjoy being locked out of your own life).
