1	C		Yes

Product Description

Get replacement or spare keys for your Yale 2100 Series locks with our professional, high-precision key cutting service. Commonly used on uPVC doors, these keys are cut to code using advanced electronic machines to ensure a perfect fit and smooth operation.

To order, locate your original key code card and enter your codes into the box provided. The Yale 2100 Series card features:

- An **'A' code** (6 digits, e.g., A 123456)

- A **'C' code** (4 digits, e.g., C 1234)

Important Compatibility Notice: If your key code card includes a **'B' code**, please **do not order from this page**. A 'B' code indicates you have a Yale Superior lock, which requires a different key cutting service. Keys cut on this page using a 'B' code will not function, and you will still be charged.

For your security, we recommend choosing a delivery address different from where the locks are installed, such as a workplace.

Technical Specifications

- **Compatible Lock Series:** Yale 2100 Series
- **Code Format:** 'A' code (6 digits) and 'C' code (4 digits)
- **Key Type:** Dimple and groove
- **Application:** uPVC door locks and Euro cylinders

Key Features

- **High-Precision Cutting:** Cut to exact factory specifications using automated electronic machines.
- **Simple Ordering Process:** Just enter your A and C codes to get a perfect duplicate.
- **Fast Nationwide Delivery:** Reliable and prompt dispatch to your chosen address.
- **Security-Conscious Service:** Safe ordering with recommended alternative delivery address options.

Brand Profile

Yale

Yale is one of the most recognisable names in locks and home security — the kind of brand that's become so default it's basically a synonym for "lock" in a lot of people's heads. The story starts with **Linus Yale** and the invention/development of the **pin-tumbler** concept that underpins a huge chunk of modern lock design, then scales into mass manufacturing and global distribution through the industrial era.

Today, Yale sits in an interesting split-brain reality:

- **Outside the US & Canada**, **Yale is an ASSA ABLOY brand**, and Yale's own regional "About" pages explicitly state the brand was purchased by ASSA ABLOY in **August 2000**.
- **In the US & Canada**, the **Yale and August** brands were sold off as part of antitrust remedies tied to ASSA ABLOY's Spectrum acquisition; Reuters and The Verge both describe Yale being retained by ASSA ABLOY outside North America, while the US/Canada Yale brand moved to **Fortune Brands Innovations**.

Product-wise, Yale spans the whole spectrum from **classic mechanical cylinders and door hardware** through to **smart locks and connected access** under the Yale Home umbrella. A key modern milestone was ASSA ABLOY's acquisition of **August Home** (completed in **December 2017**), which fed into the broader "smart access" push around app-based entry and connected ecosystems.
