Product Description

The Yale 713 & 714 Disc Tumbler Padlocks are practical, dependable security solutions designed for low to medium security applications. These padlocks are ideal for securing everyday items such as toolboxes, lockers, garden sheds, gates, and ladders. Constructed with a robust die-cast zinc body in a dull metal grey finish, they offer reliable durability.

Equipped with a disc tumbler locking mechanism, these padlocks provide basic protection against tampering. The hardened steel sprung shackle is designed to resist cutting and sawing, while the corrosion-resistant body makes them suitable for indoor use and light outdoor environments.

These padlocks are available in multiple body widths, weights, and keying options, including Keyed Alike and Keyed To Differ configurations. Please choose your preferred size, keying, and packaging options from the selection below to find the perfect fit for your security needs.

Technical Specifications

Brand Profile

Yale

Yale is one of the most recognisable names in locks and home security — the kind of brand that's become so default it's basically a synonym for "lock" in a lot of people's heads. The story starts with **Linus Yale** and the invention/development of the **pin-tumbler** concept that underpins a huge chunk of modern lock design, then scales into mass manufacturing and global distribution through the industrial era.

Today, Yale sits in an interesting split-brain reality:

- **Outside the US & Canada**, **Yale is an ASSA ABLOY brand**, and Yale's own regional "About" pages explicitly state the brand was purchased by ASSA ABLOY in **August 2000**.
- **In the US & Canada**, the **Yale and August** brands were sold off as part of antitrust remedies tied to ASSA ABLOY's Spectrum acquisition; Reuters and The Verge both describe Yale being retained by ASSA ABLOY outside North America, while the US/Canada Yale brand moved to **Fortune Brands Innovations**.

Product-wise, Yale spans the whole spectrum from **classic mechanical cylinders and door hardware** through to **smart locks and connected access** under the Yale Home umbrella. A key modern milestone was ASSA ABLOY's acquisition of **August Home** (completed in **December 2017**), which fed into the broader "smart access" push around app-based entry and connected ecosystems.
