Labels Locked	Yes

Order	Label	Placeholder	Required
0	PD		Yes
1	PE		Yes
2	PF		Yes

Product Description

Important, Read Before Ordering:

Please note that if your key tag / Lock face states **Yale "ULTRA**", **DO NOT ORDER** on this page as you will still be charged and the keys will not work.

If you require a spare or replacement key for your Yale Platinum 3-Star cylinder, our professional key cutting service provides a precise and reliable solution. We cut your keys to code using genuine Yale blanks, ensuring they glide smoothly and operate your lock perfectly without the risks associated with generic high-street copies.

This service is specifically for the newer generation of Yale Platinum keys, which feature a 10-digit code split across three parts starting with the letters **PD**, **PE**, and **PF**. To order, simply locate the key code card supplied with your original lock and enter the codes in the fields provided.

Important Security Notice: For your security and peace of mind, we highly recommend that you have your keys delivered to an alternative address (such as your place of work, or a friend or family member's home) rather than the address where the lock is installed.

Technical Specifications

- **Manufacturer:** Yale
- **Cylinder Compatibility:** Yale Platinum 3-Star Euro Cylinders
- **Key Code Format:** PD, PE, and PF prefixes (10 digits total)
- **Key Type:** Flat, reversible dimple and groove key
- **Key Bow:** Durable black nylon head with ring loop

Key Features

- **Genuine Yale Blanks:** Cut on official Yale branded blanks to ensure optimal fit, smooth operation, and reduced wear on your cylinder.
- **Precision Cutting:** Cut to code using advanced, computer-controlled key-cutting machines for maximum accuracy.
- **Simple Ordering Process:** Just enter your unique PD, PE, and PF codes from your key card to order.
- **Reversible Design:** Flat dimple key design allows for easy, multi-directional insertion into the lock.

Brand Profile

Yale

Yale is one of the most recognisable names in locks and home security — the kind of brand that's become so default it's basically a synonym for "lock" in a lot of people's heads. The story starts with **Linus Yale** and the invention/development of the **pin-tumbler** concept that underpins a huge chunk of modern lock design, then scales into mass manufacturing and global distribution through the industrial era.

Today, Yale sits in an interesting split-brain reality:

- **Outside the US & Canada**, **Yale is an ASSA ABLOY brand**, and Yale's own regional "About" pages explicitly state the brand was purchased by ASSA ABLOY in **August 2000**.
- **In the US & Canada**, the **Yale and August** brands were sold off as part of antitrust remedies tied to ASSA ABLOY's Spectrum acquisition; Reuters and The Verge both describe Yale being retained by ASSA ABLOY outside North America, while the US/Canada Yale brand moved to **Fortune Brands Innovations**.

Product-wise, Yale spans the whole spectrum from **classic mechanical cylinders and door hardware** through to **smart locks and connected access** under the Yale Home umbrella. A key modern milestone was ASSA ABLOY's acquisition of **August Home** (completed in **December 2017**), which fed into the broader "smart access" push around app-based entry and connected ecosystems.
