Product Description

The Yale Y111S Series Cast Iron Padlocks offer robust and reliable security for everyday applications. Constructed with a heavy-duty cast iron body and a hardened steel shackle, these open shackle padlocks are designed to resist cutting and sawing, making them ideal for securing toolboxes, lockers, sheds, and gates.

Each padlock is finished in a durable silver coating and is supplied with three keys. They are keyed to differ as standard, ensuring individual security for each lock.

These padlocks are available in a range of body widths from 32mm to 63mm, with varying shackle diameters and clearances to suit your specific security needs. Please select your preferred size and specifications from the options below.

Brand Profile

Yale

Yale is one of the most recognisable names in locks and home security — the kind of brand that's become so default it's basically a synonym for "lock" in a lot of people's heads. The story starts with **Linus Yale** and the invention/development of the **pin-tumbler** concept that underpins a huge chunk of modern lock design, then scales into mass manufacturing and global distribution through the industrial era.

Today, Yale sits in an interesting split-brain reality:

- **Outside the US & Canada**, **Yale is an ASSA ABLOY brand**, and Yale's own regional "About" pages explicitly state the brand was purchased by ASSA ABLOY in **August 2000**.
- **In the US & Canada**, the **Yale and August** brands were sold off as part of antitrust remedies tied to ASSA ABLOY's Spectrum acquisition; Reuters and The Verge both describe Yale being retained by ASSA ABLOY outside North America, while the US/Canada Yale brand moved to **Fortune Brands Innovations**.

Product-wise, Yale spans the whole spectrum from **classic mechanical cylinders and door hardware** through to **smart locks and connected access** under the Yale Home umbrella. A key modern milestone was ASSA ABLOY's acquisition of **August Home** (completed in **December 2017**), which fed into the broader "smart access" push around app-based entry and connected ecosystems.
