Specification Summary

Brand	Yale
Product type	Laminated

Product Description

The Yale Y125B High Security Laminated Steel Long Shackle Padlock is a robust and highly weather-resistant security solution, engineered to protect your outdoor belongings. Featuring a solid laminated steel body and a hardened steel shackle, this padlock offers excellent resistance against cutting, twisting, and pulling attacks. Its extended 63mm long shackle provides the extra clearance needed to secure larger or awkwardly shaped items, making it ideal for garden sheds, gates, and chains.

Designed to withstand harsh outdoor environments, the Y125B is built with anti-corrosive internal components and has been rigorously tested for up to 120 hours of corrosion resistance. It features a secure 5-pin cylinder and a double stainless steel ball locking mechanism to prevent prying and forced entry. For added convenience, the padlock has a self-locking snap-shut action, allowing you to lock it without using the key.

Tested to EN 12320:2012 standards and achieving a CEN Grade 2 rating, this padlock is built for long-lasting performance, having undergone 10,000 open-and-close cycle tests. It is supplied complete with three keys.

Technical Specifications

- **Body Width:** 46.7mm
- **Body Height:** 40mm
- **Body Depth:** 28.4mm
- **Shackle Diameter:** 6.35mm
- **Vertical Clearance:** 63mm
- **Horizontal Clearance:** 20.2mm
- **Body Material:** Laminated steel
- **Shackle Material:** Hardened steel
- **Cylinder Type:** 5-pin cylinder
- **Security Rating:** CEN Grade 2 / EN 12320:2012
- **Keys Supplied:** 3
- **Weight:** 275g

Key Features

- **Long Shackle Design:** Extended 63mm vertical clearance is perfect for securing gates, chains, and oddly-shaped items.
- **High-Security Locking:** Double stainless steel ball locking mechanism protects against pulling and prying attacks.
- **Weather Resistant:** Tested up to 120 hours for corrosion resistance with anti-corrosive internal components, making it ideal for outdoor use.
- **Robust Construction:** Hardened steel shackle prevents cutting, while the laminated steel body offers maximum physical durability.
- **Rigorously Tested:** Certified to EN 12320:2012 standards and cycle-tested up to 10,000 times for reliable, long-term operation.
- **Convenient Operation:** Features a self-locking snap-shut shackle that locks securely without requiring a key.

Brand Profile

Yale

Yale is one of the most recognisable names in locks and home security — the kind of brand that's become so default it's basically a synonym for "lock" in a lot of people's heads. The story starts with **Linus Yale** and the invention/development of the **pin-tumbler** concept that underpins a huge chunk of modern lock design, then scales into mass manufacturing and global distribution through the industrial era.

Today, Yale sits in an interesting split-brain reality:

- **Outside the US & Canada**, **Yale is an ASSA ABLOY brand**, and Yale's own regional "About" pages explicitly state the brand was purchased by ASSA ABLOY in **August 2000**.
- **In the US & Canada**, the **Yale and August** brands were sold off as part of antitrust remedies tied to ASSA ABLOY's Spectrum acquisition; Reuters and The Verge both describe Yale being retained by ASSA ABLOY outside North America, while the US/Canada Yale brand moved to **Fortune Brands Innovations**.

Product-wise, Yale spans the whole spectrum from **classic mechanical cylinders and door hardware** through to **smart locks and connected access** under the Yale Home umbrella. A key modern milestone was ASSA ABLOY's acquisition of **August Home** (completed in **December 2017**), which fed into the broader "smart access" push around app-based entry and connected ecosystems.
