Specification Summary

Brand	Yale
Product type	Laminated

Product Description

The Yale Y125B High Security Laminated Steel Open Shackle Padlock is designed to provide reliable outdoor protection for your garden sheds, gates, and other high-value outdoor items. Featuring a solid laminated steel body with a protective bumper, this padlock is built to withstand physical attacks while protecting surrounding surfaces from scratches.

For enhanced security, the padlock is equipped with a hardened steel shackle to resist cutting and sawing, alongside a double ball locking mechanism that prevents prying and pulling. The internal components are anti-corrosive, and the padlock has been rigorously tested to EN 12320:2012 for resistance against cutting, twisting, and pulling. It has also undergone up to 120 hours of corrosion resistance testing and 10,000 opening and closing cycles to ensure long-lasting performance in harsh weather conditions.

This padlock is available in multiple body widths ranging from 40mm to 60mm, with various weights, barcodes, manufacturer references, and pack quantities (single or triple packs) to suit your security needs. Please choose your preferred size, pack quantity, and specification from the options below.

Technical Specifications

- **Body Material:** Laminated steel
- **Shackle Material:** Hardened steel
- **Body Width:** 40mm to 60mm (please choose from the options below)
- **Pack Quantity:** 1 or 3 (please choose from the options below)
- **Keys Supplied:** 3 keys
- **Testing Standard:** Tested to EN 12320:2012
- **Corrosion Resistance:** Tested up to 120 hours
- **Cycle Testing:** Tested to 10,000 cycles
- **Locking Mechanism:** Double ball locking
- **Weight:** 225g to 675g (please choose from the options below)
- **Manufacturer Reference:** Multiple options available (please choose from the options below)

Key Features

- **High Security Shackle:** Hardened steel shackle designed to resist cutting, sawing, and twisting attacks.
- **Robust Laminated Body:** Solid laminated steel construction provides excellent physical strength.
- **Weather Resistant:** Anti-corrosive internal components and up to 120 hours of corrosion resistance testing make it ideal for outdoor use.
- **Double Ball Locking:** Offers enhanced protection against pulling and prying attacks.
- **Multiple Options Available:** Choose from a range of body widths, weights, and pack quantities below to match your specific security requirements.

Brand Profile

Yale

Yale is one of the most recognisable names in locks and home security — the kind of brand that's become so default it's basically a synonym for "lock" in a lot of people's heads. The story starts with **Linus Yale** and the invention/development of the **pin-tumbler** concept that underpins a huge chunk of modern lock design, then scales into mass manufacturing and global distribution through the industrial era.

Today, Yale sits in an interesting split-brain reality:

- **Outside the US & Canada**, **Yale is an ASSA ABLOY brand**, and Yale's own regional "About" pages explicitly state the brand was purchased by ASSA ABLOY in **August 2000**.
- **In the US & Canada**, the **Yale and August** brands were sold off as part of antitrust remedies tied to ASSA ABLOY's Spectrum acquisition; Reuters and The Verge both describe Yale being retained by ASSA ABLOY outside North America, while the US/Canada Yale brand moved to **Fortune Brands Innovations**.

Product-wise, Yale spans the whole spectrum from **classic mechanical cylinders and door hardware** through to **smart locks and connected access** under the Yale Home umbrella. A key modern milestone was ASSA ABLOY's acquisition of **August Home** (completed in **December 2017**), which fed into the broader "smart access" push around app-based entry and connected ecosystems.
