Product type	Accessory

Product Description

The Alpro 5211 Mounting Bridging is an essential hardware accessory designed to facilitate the secure installation and precise alignment of Alpro locking systems. Also known as bridging clips or a fitting kit, these components are specifically engineered to help mount and screw locks securely into aluminium door profiles.

By providing a stable mounting platform, this kit ensures that lock components are correctly aligned within the door assembly, promoting smooth lock operation and long-lasting performance. Each pack is supplied complete with the necessary fixing screws, making installation straightforward and efficient for locksmiths and installers alike. Designed to suit the extensive Alpro range of metal door locks, these mounting bridges are a reliable choice for commercial and residential metal door applications.

Technical Specifications

- **Brand:** Alpro
- **Manufacturer Reference:** 5211
- **Part Number:** L22553
- **Pack Quantity:** 1 Pair
- **Suits Product:** Alpro metal door locks
- **Weight:** 40g
- **Barcode:** 5055120744018

Key Features

- **Secure Alignment:** Facilitates the precise alignment and secure installation of lock components within metal door assemblies.
- **Complete Kit:** Supplied complete with fixing screws for a straightforward installation.
- **Supplied in Pairs:** Provided as a pair to meet standard mounting requirements.
- **High Compatibility:** Specifically designed to suit the Alpro range of metal door locks.

Brand Profile

Alpro

Alpro (Alpro Architectural Hardware) is a UK supplier of **architectural door hardware and access-control components**, focused heavily on the **commercial aluminium door (OEM) market** and the wider **access control** environment. It operates as a **division of IEC Limited**, an **independent, family-owned** company founded in **1938** to supply quality mechanical components.

Alpro's catalogue spans both **mechanical** and **electro-mechanical** products: contemporary **pull handles**, **lever/paddle handles**, **deadlocks/deadlatches**, **cylinders**, **transom door closers**, and hardware like **flushbolts** and **armoured strikes**, alongside access-control staples such as **electric strikes**, **deadlocking/solenoid bolts**, **shearlocks**, **cabinet locks**, and **IP-rated keypads and exit switches**.

The company also highlights **BS EN ISO 9001:2015 approval**, technical support, CAD/design capability, and a stock-led operation aimed at quick dispatch - positioning Alpro as a practical "solve the door problem" brand for installers and fabricators rather than a consumer retail name.
