

The Asec BS3621 Double Euro Mortice Deadlock is a complete, high-security locking solution designed to meet and surpass the rigorous requirements of BS3621:2007. This comprehensive set is tested together as a single unit, ensuring maximum security and reliability for external doors where insurance-approved protection is required.

Each kit is supplied fully equipped with a robust mortice lock case, a 70mm (35/35) double euro cylinder, a two-part security escutcheon set with fixings, and three keys. The lock features a hardened steel deadbolt with a substantial 20mm throw, offering exceptional resistance to sawing and physical attack.

This deadlock is available in multiple case depths, barcodes, and manufacturer references. Please select your required specifications from the options below to ensure the perfect fit for your door.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that “*would never become available through the large multiple retailers.*”

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories.**

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand's identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
