## Specification Summary

<b>Brand</b>	Borg digital locks
<b>Product type</b>	Borg digital locks

## Product Description

The Borg BL2421 ECP is a robust, double-sided mechanical digital lock designed as a direct lever handle upgrade for the standard BL2000 ECP series. Featuring back-to-back keypads, this model provides secure access control from both sides of the door, with each keypad operating on its own independent coding chamber. It is an ideal solution for situations where traditional knob-turn handles are not suitable or accessible for all users.

A standout feature of the Easicode Pro (ECP) range is the patented "on-the-door" code change method. This innovative design eliminates the tedious process of removing tumblers from the back of the keypad, reducing a typical 15-minute job to a simple 30-second task.

The lock is equipped with an anti-thrust tubular latch, which is available in three backset sizes: 50mm, 60mm, and 70mm. Please select your preferred latch size from the options below. It is perfectly suited for internal, medium-duty wooden and composite doors.

## Technical Specifications

- **Manufacturer:** Borg Locks
- **Model:** BL2421 ECP
- **Latch Type:** Anti-thrust tubular latch
- **Backset Options:** 50mm, 60mm, or 70mm (please select from the options below)
- **Door Type:** Internal wooden and composite doors (medium-duty)
- **Keypad:** Back-to-back keypads with independent coding chambers
- **Code Combinations:** Over 4,000 potential combinations
- **Cycle Tested:** Tested up to 50,000 cycles

## Key Features

- **Double-Sided Security:** Back-to-back keypads provide secure access control from both sides of the door.
- **Easicode Pro (ECP) Technology:** Patented "on-the-door" code change method allows you to change codes in 30 seconds without removing the lock.

- **Improved Accessibility:** Ergonomic lever handles serve as a direct upgrade for situations where a knob turn cannot be used by everyone.
- **Independent Coding:** Separate coding chambers allow for different codes to be set on each side of the door.
- **Anti-Thrust Latch:** Provides enhanced security against physical tampering.

## Brand Profile

Borg digital locks

**Borg** (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
