Specification Summary

Brand Borg digital locks

Product type Borg digital locks

Product Description

The Borg BL2601 Marine Grade Pro Black Digital Lock is a highly durable, medium-duty mechanical keypad lock designed specifically for harsh outdoor and coastal environments. Featuring a specialist black e-plating finish that has been salt spray tested to over 1,000 hours, and robust stainless steel internal components, this lock is built to withstand the most demanding weather conditions. It provides an ideal, fully mechanical access control solution where compliance with the ISPS code is required, eliminating the need for complex wiring, batteries, or key management.

This model features a marine-grade 60mm anti-thrust tubular latch and offers over 8,000 potential code combinations for secure, keyless entry. For added convenience, the BL2601 comes with an optional holdback function, allowing the door or gate to be left unlocked and free-turning when required. This holdback feature can easily be removed if not needed. Reversible for left or right-handed doors, it is suitable for external timber and composite doors and gates up to 80mm thick.

Technical Specifications

- **Brand:** Borg Locks
- **Finish:** Matt Black (Marine Grade Pro)
- **Latch Type:** 60mm anti-thrust tubular latch
- **Door Thickness:** Suitable for doors and gates up to 80mm thick
- **Handing:** Fully reversible (non-handed)
- **Code Combinations:** Over 8,000 potential combinations
- **Testing:** Salt spray tested to over 1,000 hours; cycle tested to 100,000 cycles

Key Features

- **Marine Grade Pro Protection:** Specialist e-plated black finish and high-grade stainless steel internals offer exceptional corrosion resistance in harsh coastal environments.
- **Optional Holdback Function:** Includes a holdback feature to keep the door unlocked for free access, which can be removed if not required.

- **ISPS Code Compliant:** Provides a reliable mechanical access control solution where compliance with the ISPS code is essential.
- **Anti-Thrust Latch:** Supplied with a fully marine-grade, durable 60mm anti-thrust tubular latch to prevent forced manipulation.
- **Fully Mechanical Operation:** No batteries, wiring, or external power required, ensuring continuous and hassle-free operation.
- **Versatile Application:** Ideal for external use on medium-duty timber and composite doors, as well as pedestrian gates.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
