Specification Summary

Brand Borg digital locks

Product type Borg digital locks

Product Description

The Borg BL3030 Mini Gate Lock is a compact, high-security digital lock designed specifically for external metal box section gates. Engineered with space in mind, it features a smaller keypad footprint than standard gate locks, making it an ideal retrofit solution for narrow gate stiles or gates previously fitted with manual slide latches.

Equipped with back-to-back keypads, the BL3030 ensures secure access control in both directions. It features Borg’s innovative Easicode Pro (ECP) system, allowing quick, on-the-door code changes in under 30 seconds. The code change mechanism is safely concealed behind a removable shield, eliminating the need to remove the lock from the gate.

Built to withstand the elements, this lock features a Marine Grade Pro (MG Pro) black finish that has been salt-spray tested for over 1,000 hours. It is designed to suit metal gate profiles between 30mm and 60mm and comes with standard 122mm fixing centres.

Please choose your preferred handing (Left Hand or Right Hand) and whether you require the optional adaptor kit (to suit 140mm fixing centres) from the options below.

Technical Specifications

- **Brand:** Borg Locks
- **Model:** BL3030
- **Keypad Type:** Double-sided (back-to-back)
- **Finish:** Marine Grade Pro (MG Pro) Black
- **Gate Profile Compatibility:** 30mm to 60mm box section gates
- **Fixing Centres:** 122mm (standard) or 140mm (with adaptor kit)
- **Handing:** Left Hand (LH) or Right Hand (RH) options available
- **Fixings:** Supplied with M8 fixing bolts

Key Features

- **Compact Design:** Smaller keypad footprint ideal for narrow gate stiles and tight spaces.

- **On-the-Gate Code Change:** Features the Easicode Pro system with a concealed code change button behind a removable shield.
- **Two-Way Security:** Back-to-back keypads require code entry for both entry and exit.
- **Weatherproof Durability:** Marine-grade finish salt-spray tested for over 1,000 hours to resist harsh outdoor environments.
- **Flexible Mounting:** Available with an optional adaptor kit to accommodate 140mm fixing centres.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
