Specification Summary

Brand Borg digital locks

Product type Borg digital locks

Product Description

The Borg BL3100DKO ECP is a high-performance, single-sided mechanical digital lock designed specifically for external metal box section gates. Combining heavy-duty security with user-friendly operation, this lock features an anti-climb knob turn keypad on the outside and a free-exit paddle handle on the inside.

A standout feature of this model is Borg's patented Easicode Pro (ECP) technology. This allows you to change the entry code on the gate in under 30 seconds, completely eliminating the tedious process of removing the lock and tumblers. For added security and flexibility, the DKO variant includes a key override function that allows key entry and a deadlocking facility.

Built to withstand the elements, the lock features a Marine Grade Pro (MG Pro) black finish that has been salt spray tested for 1,000 hours, ensuring long-term durability in harsh outdoor environments.

This lock is available in both Left-Handed (LH) and Right-Handed (RH) configurations. Please select your required handing from the options below.

Technical Specifications

- **Manufacturer:** Borg Locks
- **Series:** BL3100 ECP Series
- **Gate Type:** External metal box section gates
- **Handing:** Left Hand (LH) or Right Hand (RH) options available
- **Keypad:** Single-sided (outside keypad, inside free-exit handle)
- **Latchbolt:** Fully adjustable 65mm - 80mm latchbolt
- **Finish:** Black Marine Grade Pro (MG Pro)
- **Cycle Testing:** Tested to 100,000 cycles
- **Salt Spray Testing:** Tested to 1,000 hours
- **Code Combinations:** Over 4,000 potential combinations

Key Features

- **Easicode Pro (ECP):** Patented "on-the-door" code change mechanism allows quick code updates in seconds without removing the lock.
- **Key Override (DKO):** Integrated key override function with deadlocking capability for emergency access and enhanced security.
- **Anti-Climb Design:** Specially designed anti-climb knob turn keypad housing prevents unauthorized manipulation.
- **Marine-Grade Durability:** Corrosion-resistant finish makes it ideal for harsh external environments and coastal areas.
- **Free Exit:** Inside paddle handle allows quick, unrestricted exit from the secured area.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
