Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg BL3400 ECP is a robust, single-sided mechanical digital lock designed specifically for external metal box section gates. Combining a heavy-duty, anti-climb lockcase with a marine-grade keypad, this lock is built to withstand harsh outdoor environments and heavy use.

A standout feature of this model is the patented Easicode Pro (ECP) code chamber. This allows quick and hassle-free "on-the-door" code changes in seconds, eliminating the need to remove the lock from the gate. On the outside, the keypad features a free-turning lever handle that remains clutched and inactive until the correct code is entered, preventing forced entry. The inside features an uncoded lever handle with a convenient holdback function, allowing the gate to be left unlocked for free passage when required.

Designed for easy installation, the lock utilizes a forend fixing system that clamps directly onto the gate post, avoiding the need for morticing. It is supplied with a fully adjustable and reversible latchbolt, making it suitable for both left and right-hand hung gates. The standard fixings accommodate gate profiles between 30mm and 60mm, with an extra-large latchbolt available separately for profiles up to 120mm.

Technical Specifications

- **Manufacturer:** Borg Locks
- **Model:** BL3400 ECP
- **Lock Type:** Mechanical digital gate lock (single-sided keypad)
- **Gate Compatibility:** Metal box section gates (30mm to 60mm thickness as standard; up to 120mm with optional XL latchbolt)
- **Latchbolt:** 65mm - 80mm adjustable and reversible latchbolt
- **Finish:** Marine Grade Pro (MG Pro) black coating (salt spray tested to 1,000 hours)
- **Code Chamber:** Easicode Pro (ECP) for on-the-door code changes
- **Handing:** Reversible (suitable for left and right-hand hung gates)
- **Code Combinations:** Over 4,000 potential combinations
- **Inside Handle:** Uncoded lever handle with holdback function
- **Outside Handle:** Free-turning clutched lever handle

Key Features

- **Easicode Pro (ECP) Technology:** Change the entry code quickly and easily while the lock remains mounted on the gate.
- **Marine-Grade Durability:** MG Pro black finish is salt spray tested to 1,000 hours, ensuring exceptional corrosion resistance in harsh outdoor conditions.
- **Clutched Keypad Handle:** The external lever handle rotates freely until the correct code is entered, protecting the internal mechanism from forced entry and abuse.
- **Inside Holdback Function:** The uncoded inside lever handle features a holdback option, allowing the gate to be set to free-passage mode when required.
- **Simple Installation:** Features a forend fixing system that clamps directly onto the gate post, eliminating the need for complex mortice cutting.
- **Anti-Climb Design:** Specially designed lockcase prevents intruders from using the lock as a foothold.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
