Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg Locks BL3400DKO ECP is a high-quality, marine-grade mechanical digital gate lock designed specifically for metal box section gates. It features a coded lever handle keypad on the external side and an uncoded, free-exit lever handle with a holdback function on the inside, making it ideal for securing perimeter gates while allowing easy egress.

This model is equipped with the patented Easicode Pro (ECP) coding chamber, enabling quick and hassle-free code changes directly on the gate without removing the lock. The "DKO" key override function provides secondary access via a key and includes a built-in deadbolt function for enhanced security. Built to withstand harsh outdoor environments, the lock features a robust black marine-grade finish that has been salt spray tested for 1,000 hours.

The free-turning lever handle on the keypad remains clutched and rotates freely until the correct code is entered, protecting the internal mechanism from forced entry. With a fully adjustable and reversible latchbolt, this lock is highly versatile and suitable for both left and right-hand hung gates.

Technical Specifications

- **Brand:** Borg Locks
- **Model:** BL3400DKO ECP
- **Gate Type:** Metal box section gates
- **Gate Thickness:** 30mm to 60mm as standard (up to 120mm with optional XL latchbolt, part S311a)
- **Finish:** Black Marine Grade (MG Pro)
- **Salt Spray Tested:** 1,000 hours
- **Keypad:** Single-sided (coded keypad exterior, uncoded lever handle interior)
- **Inside Handle:** Uncoded lever handle with holdback function
- **Code Combinations:** Over 4,000 potential combinations
- **Handing:** Fully reversible on-site (fits left or right-hand hung gates)
- **Latchbolt:** Adjustable and reversible latchbolt (65-80mm projection)

- **Key Override:** Yes (DKO cylinder with deadbolt function)

Key Features

- **Easicode Pro (ECP):** Quick and simple "on the door" code changes without removing the lock from the gate.
- **Key Override Function:** Allows key entry and deadlocks the keypad for added security.
- **Free-Turning Handle:** Keypad handle rotates freely until the correct code is entered, preventing damage from forced entry.
- **Inside Holdback Handle:** Uncoded inside lever handle allows free exit and features a holdback function for convenience.
- **Weather Resistant:** Marine-grade finish tested to 1,000 hours of salt spray, ideal for harsh external environments.
- **Anti-Climb Lockcase:** Specially designed lockcase to prevent climbing or tampering.
- **Easy Installation:** Reversible latchbolt and forend fixing system simplify fitting on various gate profiles.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
