Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg BL3430DKO is a heavy-duty, marine-grade digital gate lock designed specifically for external metal box section gates. Combining robust security with exceptional weather resistance, this model features back-to-back keypads to control access from both sides of the gate, making it an ideal choice for high-security perimeter control.

A key differentiator of the BL3430DKO is its integrated key override and deadbolt function, allowing for quick key access and enhanced physical security when required. The lock is equipped with free-turning lever handles that remain clutched and spin freely until the correct code is entered, protecting the internal mechanism against forced entry and vandalism.

Built to withstand harsh outdoor environments, the lock features a black marine-grade finish that has been salt spray tested for 1,000 hours. It is highly adaptable, featuring an anti-climb lockcase and a fully adjustable, reversible latchbolt to suit both left and right-hand hung gates. The standard fixings accommodate metal box sections between 30mm and 60mm, with an optional XL latchbolt available to suit profiles up to 120mm.

Technical Specifications

- **Manufacturer:** Borg Locks
- **Model:** BL3430DKO
- **Finish:** Black Marine Grade (MG Pro)
- **Gate Type:** External metal box section gates
- **Gate Thickness:** 30mm - 60mm (standard fixings); up to 120mm with optional XL latchbolt (part S311a)
- **Latchbolt:** Reversible and adjustable (65mm - 80mm projection)
- **Keypads:** Back-to-back (double-sided)
- **Handle Type:** Free-turning lever handles
- **Key Override:** Yes, with deadbolt function as standard
- **Code Combinations:** Over 4,000 potential combinations
- **Weather Resistance:** Salt spray tested to 1,000 hours

Key Features

- **Double-Sided Security:** Requires a code for both entry and exit, providing maximum security for perimeter gates.
- **Key Override & Deadbolt:** Built-in key cylinder allows for emergency key override and a secure deadbolt function.
- **Clutched Lever Handles:** Free-turning handles prevent damage to the internal mechanism from forced turning or vandalism.
- **Marine-Grade Protection:** Salt spray tested to 1,000 hours, making it highly durable and ideal for harsh outdoor or coastal environments.
- **Fully Reversible:** On-site reversible design makes it suitable for both left-hand and right-hand hung gates.
- **Anti-Climb Design:** Specially designed lockcase helps prevent unauthorized climbing or tampering.
- **Easy Installation:** Utilises a secure forend fixing system to simplify fitting on metal box sections.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
