Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg BL4441 ECP is a medium-heavy duty, marine-grade mechanical digital lock designed specifically for external wooden doors and timber gates. Featuring back-to-back keypads, this model requires a code to be entered for both entry and exit. This double-sided keypad setup is ideal for high-security perimeters or gardens where you want to prevent children or unauthorised individuals from easily opening the gate from the inside.

Equipped with Borg's patented Easicode Pro (ECP) chamber, the BL4441 allows for quick and simple "on-the-door" code changes. This eliminates the need to remove the lock from the gate, saving time and preventing potential damage during code changes.

Built to withstand the harshest outdoor environments, the lock features 316 stainless steel internal components and a specialist MG Pro black finish. This marine-grade coating has been salt-spray tested for 1,000 hours, ensuring exceptional corrosion resistance. The unit comes complete with a matching 60mm tubular latch and is designed to fit gates up to 80mm thick. It also shares the same footprint as the BL2600 series, making it an easy direct upgrade.

Technical Specifications

- **Brand:** Borg Locks
- **Model:** BL4441 ECP
- **Finish:** Black (MG Pro Marine Grade)
- **Latch:** 60mm tubular latch (standard)
- **Door/Gate Thickness:** Suitable for doors and gates up to 80mm thick (typically 35mm to 80mm)
- **Keypad Configuration:** Back-to-back (double-sided keypads)
- **Handle Type:** Free-turning lever handles (clutched until correct code is entered)
- **Code Combinations:** Over 4,000 combinations
- **Coding Chamber:** Easicode Pro (on-door code change)
- **Salt Spray Resistance:** Tested to 1,000 hours

Key Features

- **Double-Sided Security:** Back-to-back keypads require a code for both entry and exit, preventing unauthorised egress and keeping children safe inside.
- **On-Door Code Change:** Patented Easicode Pro (ECP) technology allows you to change the PIN code quickly on the door without removing the lock.
- **Marine-Grade Durability:** MG Pro black coating and 316 stainless steel internal components offer superior corrosion resistance, tested to 1,000 hours of salt spray.
- **Clutched Lever Handles:** Free-turning lever handles prevent damage to the internal mechanism from forced entry attempts.
- **Easy Upgrade:** Shares the same footprint as the popular BL2600 series, allowing for a straightforward, hassle-free upgrade.
- **Weatherproof Design:** Specifically engineered for external wooden and timber gate applications in harsh coastal or outdoor environments.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
