Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg BL4442 ECP MG is a robust, medium-to-heavy-duty mechanical digital lock designed specifically for external wooden doors and timber gates. Featuring back-to-back keypads, this lock provides secure, coded access control for both entry and exit, making it an ideal choice for high-traffic areas or perimeter gates where two-way security is paramount.

Equipped with Borg’s patented Easicode Pro (ECP) coding chamber, the BL4442 allows for quick and simple "on the door" code changes, eliminating the hassle of removing the lock and preventing potential damage during recoding. The unit is fitted with free-turning lever handles on both sides, which rotate freely until the correct code is entered, protecting the internal mechanism against forced entry and vandalism.

Built to withstand the harshest outdoor conditions, this model features a specialist Marine Grade Pro (MG Pro) black finish that has been salt spray tested to over 1,000 hours. It comes complete with a 28mm narrow stile aluminium latch, making it perfect for situations where a standard mortice lock is too deep. Additionally, it shares the same footprint as the BL2600 and BL2600 ECP, allowing for a seamless, direct upgrade.

Technical Specifications

- **Brand:** Borg Locks
- **Model:** BL4442 ECP MG
- **Latch Type:** 28mm narrow stile aluminium latch
- **Keypad:** Back-to-back (dual keypads)
- **Handle Type:** Free-turning flat bar lever handles
- **Finish:** Marine Grade Pro (MG Pro) Black
- **Gate/Door Thickness:** Fits up to 80mm as standard
- **Coding System:** Easicode Pro (ECP) on-the-door code change
- **Footprint:** Shares footprint with BL2600 and BL2600 ECP series
- **Weather Resistance:** Salt spray tested to over 1,000 hours

Key Features

- **Dual-Sided Security:** Back-to-back keypads require a code for both entry and exit, ensuring complete perimeter control.
- **On-the-Door Code Changes:** Patented Easicode Pro chamber allows you to change the code in seconds without removing the lock from the gate.
- **Vandal Resistant:** Free-turning lever handles prevent damage to the internal mechanism from forced entry attempts.
- **Marine Grade Durability:** MG Pro black finish and stainless steel fixings provide exceptional corrosion resistance in harsh outdoor environments.
- **Narrow Stile Latch:** The 28mm aluminium latch is ideal for narrow stiles, panelled doors, or gates with varying wood thicknesses.
- **Easy Retrofitting:** Shares the same footprint as the BL2600 series for a quick and simple upgrade without redrilling.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
