**Specification Summary**

<b>Brand</b>	Borg digital locks
<b>Product type</b>	Borg digital locks

**Product Description**

The Borg BL5009 ECP is a robust, medium-to-heavy-duty digital lock designed for demanding environments where standard lighter-duty locks fall short. Equipped with a fully clutched round bar handle on both the keypad and the inside unit, it offers exceptional durability and smooth operation.

A standout feature of this model is the patented Easicode Pro (ECP) coding chamber. This innovative technology allows for quick and hassle-free "on the door" code changes, eliminating the need to remove the lock from the door and reducing the risk of damage during recoding. Additionally, the lock features an optional free passage mode, enabling users to temporarily bypass the coding mechanism for unrestricted access when required.

This unit is supplied with a 60x72mm mortice nightlatch, featuring a 12.5mm latch bolt and a euro profile cylinder hole to support a key override (cylinder sold separately). It is suitable for internal and sheltered external applications on wooden, composite, aluminium, and steel doors.

**Technical Specifications**

- **Manufacturer:** Borg Locks
- **Model:** BL5009 ECP
- **Lock Type:** 60x72mm mortice nightlatch
- **Backset:** 60mm
- **Latch Bolt:** 12.5mm
- **Keypad:** 13-button mechanical keypad
- **Code Combinations:** Over 1,000
- **Door Compatibility:** Wooden, composite, aluminium, and steel doors
- **Suitability:** Internal and sheltered external doors
- **Duty Rating:** Medium to heavy-duty
- **Cycle Tested:** 100,000+ cycles

**Key Features**

- **Easicode Pro (ECP) Chamber:** Allows quick and easy "on the door" code changes in seconds without removing the lock.
- **Clutched Round Bar Handles:** Fully clutched round bar handles on both the keypad and inside unit for enhanced durability.
- **Optional Free Passage Mode:** Deactivates the coding chamber to allow free entry without entering a code.
- **Key Override Support:** Nightlatch features a euro profile cylinder hole for an optional key override (cylinder sold separately).
- **Robust Construction:** Designed for high-traffic applications where lighter-duty locks are insufficient.

## Brand Profile

Borg digital locks

**Borg** (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
