Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg BL5101 ECP is a medium to heavy-duty mechanical digital lock designed for robust, reliable access control. Featuring an ergonomic, fully clutched knob-turn keypad on the exterior and a matching inside handle, it is ideal for timber, composite, and steel doors in both residential and commercial environments.

Equipped with Borg's innovative Easicode Pro (ECP) technology, this lock allows you to change the entry code directly on the door in seconds, eliminating the hassle of removing the unit. It also features an optional free passage mode, allowing the coding chamber to be bypassed for unrestricted access when required.

This lock comes complete with a tubular latch and is suitable for internal or sheltered external installations. It is available in Satin Chrome (SC) and Satin Stainless (SS) finishes - please select your preferred option below.

Technical Specifications

- **Manufacturer:** Borg Locks
- **Series:** BL5000 ECP
- **Lock Type:** Mechanical digital keypad with inside handle
- **Latch:** Tubular latch (60mm or 70mm backset)
- **Door Compatibility:** Timber, composite, and steel doors
- **Handing:** Reversible (non-handed)

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
