Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg BL5400 ECP is a medium to heavy-duty mechanical digital lock designed for demanding environments where standard, lighter-duty locks may not suffice. Featuring a robust, free-turning flat bar lever handle, this lock remains clutched and free-rotating until the correct code is entered, protecting the internal mechanism from forced entry and vandalism.

At the heart of this lock is Borg's patented Easicode Pro (ECP) coding chamber. This innovative technology allows for quick and simple "on-the-door" code changes, eliminating the need to remove the lock from the door and avoiding the risk of damage associated with traditional manual re-coding. It also features an optional free passage mode, allowing you to temporarily bypass the coding mechanism for unrestricted access during high-traffic periods.

This unit is supplied as front and back plates only (no latch or locking device is included), making it the perfect choice for retrofitting to existing lock setups. It is suitable for internal and sheltered external applications on timber, composite, and steel doors.

Please select your preferred finish from the options below.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
