Specification Summary

Brand Borg digital locks

Product type Borg digital locks

Product Description

The Borg BL5401 ECP is a medium- to heavy-duty mechanical digital lock designed for doors requiring robust and reliable access control. Part of the innovative Easicode Pro (ECP) range, this lock features a quick, on-the-door code change system, allowing you to change the entry code in seconds without removing the unit from the door.

Equipped with a fully clutched flat bar lever handle, it provides enhanced durability by preventing damage from forced entry attempts. The lock is fully reversible on-site, making it suitable for both left- and right-hand hung doors. It also includes an optional free passage function, allowing you to temporarily bypass the coding mechanism for unrestricted access when needed.

This model is supplied with a 60mm tubular latch featuring an anti-thrust pin for automatic locking when the door is closed. It is available in Satin Chrome (SC) and Satin Stainless Steel (SS) finishes - please select your preferred option from the variants below.

Technical Specifications

- **Backset:** 60mm
- **Door Thickness:** Suitable for doors 35mm to 65mm thick
- **Handing:** Fully reversible on-site
- **Code Capacity:** Over 1,000 combinations
- **Cycle Rating:** Tested to 100,000+ cycles
- **Finishes Available:** Satin Chrome (SC) or Satin Stainless Steel (SS)
- **Keypad Buttons:** 13 buttons (12 stainless steel buttons and 1 code change button)

Key Features

- **Easicode Pro (ECP) System:** Allows quick and easy code changes directly on the door in seconds.
- **Clutched Flat Bar Handle:** Free-rotating lever handle prevents damage from forced turning.
- **Optional Free Passage:** Allows the coding mechanism to be bypassed for unrestricted access.
- **Medium to Heavy-Duty:** Built with a cast housing and stainless steel buttons, ideal for high-traffic internal or sheltered external doors.
- **Anti-Thrust Deadlatch:** Ensures automatic locking and added security when the door is closed.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
