Specification Summary

Brand Borg digital locks

Product type Borg digital locks

Product Description

The Borg BL5401 FT is a robust, medium- to heavy-duty mechanical digital lock designed for doors requiring both secure access control and certified fire protection. This reliable keypad lock is ideal for commercial, residential, and public buildings where durability and safety are paramount.

Certified Fire Protection

Independently tested by BM Trada, the BL5401 FT is certified for use on 30-minute and 60-minute timber fire doors (FD30 and FD60) in accordance with BS EN1634-1 and BS EN1363-1 standards. To ensure full compliance with fire safety regulations, each lock is supplied complete with an intumescent kit and high-quality stainless steel fixings.

Robust Design & Convenient Operation

The lock features a fully clutched, free-turning flat bar lever handle on both the keypad and the inside unit. This clutched mechanism protects the internal components from damage if forced entry is attempted. For added convenience, an optional free passage mode allows you to temporarily bypass the coding chamber, enabling unrestricted access without entering the code.

Suitable for internal and sheltered external use on wooden, composite, and steel doors, this unit is supplied with a 60mm tubular latch. It is available in Satin Chrome and Satin Stainless finishes - please select your preferred option from the menu below.

Technical Specifications

- **Brand:** Borg Locks
- **Model:** BL5401 FT
- **Duty Rating:** Medium to heavy duty
- **Fire Rating:** Independently tested for 30 and 60 minutes (FD30 & FD60 timber fire doors)
- **Standards Complied:** BS EN1634-1 and BS EN1363-1
- **Latch Type:** 60mm tubular latch
- **Handle Type:** Fully clutched flat bar lever handle
- **Door Compatibility:** Timber, composite, and steel doors (internal and sheltered external)
- **Keypad:** Single-sided keypad with inside handle unit
- **Finishes Available:** Satin Chrome (SC) and Satin Stainless (SS)

Key Features

- **Fire Rated Compliance:** Supplied with a dedicated intumescent kit and stainless steel fixings for certified fire door installation.
- **Clutched Handle Mechanism:** Free-turning flat bar handle prevents damage to the internal locking mechanism from forced entry attempts.
- **Optional Free Passage Mode:** Allows the coding chamber to be bypassed for easy, code-free entry during high-traffic periods.
- **Robust Construction:** Built to withstand heavy use in demanding commercial and residential environments.
- **Versatile Application:** Suitable for a wide range of door types, both internally and in sheltered outdoor locations.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
