Specification Summary

Brand Borg digital locks

Product type Borg digital locks

Product Description

The Borg BL5402 ECP is a medium to heavy-duty mechanical digital lock designed for narrow stile doors, such as aluminium or narrow-profile timber doors. It features a fully clutched, flat bar lever handle and a compact 28mm aluminium latch, making it an ideal choice for commercial and high-traffic environments where space is limited.

Equipped with Borg's patented Easicode Pro (ECP) technology, this lock allows for quick, simple, and error-free code changes directly "on the door" without the hassle of removing the unit. It also features an optional free passage mode, which can bypass the coding mechanism to allow unrestricted access during busy periods.

This non-handed, fully reversible lock is suitable for internal and sheltered external doors. It is available in Satin Chrome (SC) and Satin Stainless (SS) finishes. Please choose your preferred finish from the options below.

Technical Specifications

- **Backset:** 28mm aluminium latch
- **Handle Type:** Fully clutched flat bar lever handle (internal and external)
- **Coding Chamber:** Easicode Pro (on-the-door code change)
- **Buttons:** 13-button keypad (12 stainless steel indented buttons, 1 code change button)
- **Door Thickness:** Suits doors up to 60mm thick (with 8mm bladed spindle and M4 stainless steel fixings)
- **Handing:** Non-handed (fully reversible on-site)
- **Cycle Rating:** Tested to over 100,000 cycles
- **Finishes Available:** Satin Chrome (SC) and Satin Stainless (SS)

Key Features

- **Easicode Pro Technology:** Patented "on the door" code change mechanism eliminates the need to remove the lock for recoding.
- **Narrow Stile Design:** Compact 28mm aluminium latch is specifically designed to fit narrow stile doors.
- **Free Passage Mode:** Optional bypass function allows free entry without entering a code when required.
- **Clutched Handle:** Fully clutched flat bar lever handle prevents damage from forced entry attempts.
- **Robust Construction:** Cast housing with stainless steel buttons, tested to over 100,000 cycles for long-lasting durability.

- **Versatile Application:** Suitable for internal and sheltered external use on wood, composite, aluminium, or steel doors.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
