Specification Summary

Brand Borg digital locks

Product type Borg digital locks

Product Description

The Borg BL5403 ECP is a medium to heavy-duty mechanical digital lock designed for robust access control on internal and sheltered external doors. Featuring a modern flat bar lever handle on the keypad and a standard internal lever handle, this lock is supplied complete with a 60x72mm Euro profile lockcase (60mm backset).

A standout feature of this model is Borg's patented Easicode Pro (ECP) technology. This allows for quick, hassle-free code changes directly on the door, eliminating the need to remove the keypad and reducing the risk of lost or damaged internal components. For added security, the keypad handle is fully clutched, meaning it rotates freely until the correct code is entered to prevent damage from forced entry.

The lock also includes an optional free passage mode, allowing users to temporarily bypass the coding mechanism for unrestricted entry during busy periods. It is non-handed and fully reversible on-site, making it suitable for a wide range of wooden, composite, and steel doors.

This model is available in Satin Chrome (SC) and Satin Stainless Steel (SS) finishes - please select your preferred option below.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
