**Product type** Borg digital locks

## Product Description

The Borg BL5404 ECP is a medium to heavy-duty mechanical digital lock designed for demanding access control applications. Part of the versatile BL5400 ECP series, this model features a contemporary, fully clutched flat bar lever handle that remains free-turning until the correct code is entered, protecting the internal mechanism against force and abuse.

Equipped with Borg's patented Easicode Pro (ECP) technology, this lock allows for quick, hassle-free code changes directly on the door, eliminating the need to remove the keypad. The BL5404 is supplied with a 60x72mm escape lockcase, ensuring safe and unrestricted egress from the inside at all times, regardless of the lock status. It also features an optional free passage mode, allowing the coding chamber to be bypassed for temporary code-free access during busy periods.

This robust digital lock is suitable for internal and sheltered external doors, including timber, composite, and steel doors. It is fully reversible on-site to suit both left and right-handed doors. The BL5404 ECP is available in Satin Chrome (SC) and Satin Stainless Steel (SS) finishes - please select your preferred option from the variants below.

## Brand Profile

Borg digital locks

**Borg** (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
