Specification Summary

Brand Borg digital locks

Product type Borg digital locks

Product Description

The Borg BL5408 ECP is a medium-to-heavy duty digital keypad lock featuring a contemporary flat bar lever handle and the innovative Easicode Pro (ECP) system. Specifically designed to integrate with leading brands of panic hardware and exit devices, this unit is supplied with a dedicated adapter kit and spindles, making it an ideal choice for commercial, public, and industrial environments requiring controlled entry alongside emergency escape functionality.

With the patented Easicode Pro chamber, code changes can be completed quickly and easily 'on the door' in seconds, eliminating the need to remove the lock or risk damaging internal components. The lock also features an optional free passage mode, allowing users to temporarily bypass the coding mechanism for unrestricted access when required. Built with a fully clutched handle to prevent damage from forced entry or misuse, the BL5408 ECP is suitable for internal and sheltered external applications on timber, composite, and steel doors.

This digital lock is available in Satin Chrome (SC) and Satin Stainless (SS) finishes to suit your aesthetic requirements.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
