## Specification Summary

**Brand** Borg digital locks

**Product type** Borg digital locks

## Product Description

The Borg BL6003 FT is a heavy-duty, narrow-stile mechanical digital lock designed for high-traffic environments. This "FT" (Fire Tested) model is independently fire-tested to BS EN1634-1 for 30 and 60 minutes, and comes complete with an intumescent kit and stainless steel fixings.

With a slim body width of just 45mm, the BL6003 FT is engineered specifically for narrow-stile doors - including UPVC, aluminium, composite, and timber - where conventional digital locks cannot fit. It features a single column of 8 buttons utilizing Borg's patented double-button press system, which allows the same digit to be entered twice in the code for enhanced security and over 2,100 potential combinations.

To protect against forced entry, the free-turning lever handle remains clutched and offers no resistance until the correct code is entered. This model is supplied with a 60 x 72mm standard Euro profile lockcase, allowing for optional key override and deadbolting (Euro cylinder required, sold separately).

The Borg BL6003 FT is available in Satin Stainless or White finishes. Please select your required finish from the options below.

## Technical Specifications

- **Body Width:** 45mm
- **Fire Rating:** Independently tested to BS EN1634-1 (30 and 60 minutes)
- **Lockcase:** 60 x 72mm Euro profile lockcase
- **Code Combinations:** Over 2,100
- **Keypad:** Single column of 8 buttons
- **Cycle Rating:** Tested to over 100,000 cycles
- **Handle Rotation:** 70°
- **Finishes:** Satin Stainless (SS) and White (WH)

## Key Features

- **Fire Tested:** Certified for 30 and 60-minute fire doors, supplied with a dedicated intumescent kit
- **Narrow Stile Design:** Slim 45mm housing is perfect for narrow-stile UPVC, aluminium, composite, and timber doors

- **Patented Coding:** Unique double-button press system allows the same digit to be used twice in the code
- **Clutched Handle:** Free-turning handle prevents damage from forced entry attempts until the correct code is entered
- **Euro Profile Lockcase:** Supports optional key override and deadbolting (Euro cylinder sold separately)
- **Weather Resistant:** Suitable for internal and sheltered external applications

## Brand Profile

Borg digital locks

**Borg** (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
