Product Description

The Borg BL7101 is a heavy-duty mechanical digital lock designed to provide reliable access control in high-traffic environments. Featuring a robust keypad with an external knob turn and an internal handle unit, this model is supplied with a 60mm backset tubular latch. It is suitable for use on timber, composite, and steel doors, making it an ideal choice for both internal and external installations.

Equipped with Borg's patented Easicode Pro (ECP) system, the BL7101 allows for quick and simple "on-the-door" code changes, eliminating the need to remove the lock from the door. This saves time and reduces the risk of damage during code updates. Additionally, the lock shares a footprint with other popular heavy-duty models on the market, such as the Unican 1000 and 5000, ensuring a straightforward retrofit or upgrade process. Built with stainless steel coding components, it is engineered for long-lasting durability and smooth operation.

Technical Specifications

- **Manufacturer:** Borg Locks
- **Model:** BL7101
- **Latch Type:** 60mm backset tubular latch
- **External Operation:** Keypad with heavy-duty knob turn
- **Internal Operation:** Inside handle unit
- **Door Thickness:** Suitable for doors up to 60mm thick
- **Door Compatibility:** Timber, composite, and steel doors
- **Handing:** Non-handed (fully reversible)
- **Coding Chamber:** Stainless steel components with over 1,000 non-sequential combinations

Key Features

- **Heavy-Duty Performance:** Engineered specifically for high-traffic commercial and residential applications.
- **Easicode Pro (ECP) System:** Allows hassle-free code changes directly on the door in under a minute.
- **Easy Retrofitting:** Shares the same footprint as Unican 1000 & 5000 models for a simple upgrade.
- **Weather Resistant:** Suitable for both internal and external installations with robust corrosion resistance.
- **Free Passage Function:** Features an optional free passage mode to allow unrestricted entry when required.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
