Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg BL2605 External Marine Grade Easicode Pro (ECP) Deadbolt Push Button Code Lock in Black is a highly durable, medium-duty mechanical keypad lock designed to withstand the harshest outdoor environments. Featuring a specialist e-plating process that has been salt-spray tested to over 1,000 hours, alongside high-grade stainless steel internal components, this lock is built for long-lasting performance on external timber and composite doors and gates.

This model is specifically designed for applications where the door or gate frame is too narrow to accommodate a standard mortice latch. Instead, the BL2605 is fitted with a surface-mounted, rim-fixed deadbolt in place of an inside handle, making it the ideal security solution for thinner gates and narrow-stile doors.

Equipped with Borg's patented Easicode Pro (ECP) technology, this lock allows for quick and secure code changes directly on the door in under 30 seconds, eliminating the need to remove the unit. With over 4,000 potential combinations and a design cycle-tested to 100,000 operations, it offers reliable, keyless access control.

Technical Specifications

- **Brand:** Borg Locks
- **Model:** BL2605 ECP
- **Finish:** Black Marine Grade Pro (MG Pro 2)
- **Lock Type:** Rim-fixed surface-mounted deadbolt
- **Code Change Method:** On-the-door Easicode Pro (ECP) system
- **Code Combinations:** Over 4,000 potential combinations
- **Cycle Testing:** Tested to 100,000 cycles
- **Salt Spray Testing:** Tested to over 1,000 hours
- **Door Thickness:** Suitable for doors and gates up to 80mm thick
- **Handing:** Fully reversible (fits left and right-handed doors)
- **Internal Components:** High-grade stainless steel
- **Suitable For:** External timber and composite doors and gates

Key Features

- **Marine Grade Protection:** Specialist e-plated finish and stainless steel internals, salt-spray tested to over 1,000 hours for harsh outdoor environments.
- **Easicode Pro (ECP) System:** Patented on-the-door code change mechanism allows you to update the combination in under 30 seconds without removing the lock.
- **Rim-Fixed Deadbolt:** Ideal for narrow-stile doors and thin gates where a conventional mortice latch cannot be installed.
- **High Durability:** Cycle-tested to 100,000 operations to ensure long-term reliability in medium-duty applications.
- **Keyless Security:** Offers over 4,000 potential code combinations for secure, key-free access control.
- **Weather Resistant:** Designed specifically for external use on timber and composite gates and doors.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
