Specification Summary

Brand Borg digital locks

Product type Borg digital locks

Product Description

The Borg BL4442 MG Pro is a medium-to-heavy-duty mechanical digital lock designed to withstand the harshest outdoor environments. Featuring a back-to-back keypad configuration, this lock requires a code for both entry and exit, making it an ideal security solution for external timber gates and narrow stile doors.

Equipped with a 28mm aluminium latch, the BL4442 is specifically designed for narrower profiles. Both sides feature a free-turning flat bar lever handle that remains inactive until the correct code is entered, protecting the internal mechanism against forced entry and misuse.

To ensure long-lasting durability, the lock is coated in Borg's specialist MG Pro (Marine Grade) black finish, which has been rigorously salt spray tested for over 1,000 hours. This unit is supplied with a standard fixing kit suitable for doors and gates up to 80mm thick. It also shares the same footprint as the BL2600 series, allowing for a straightforward, direct upgrade.

Technical Specifications

- **Brand:** Borg Locks
- **Model:** BL4442 MG Pro
- **Lock Type:** Mechanical digital lock with back-to-back keypads
- **Latch Type:** Aluminium latch
- **Backset:** 28mm
- **Finish:** Marine Grade Pro (MG Pro) Black
- **Corrosion Resistance:** Salt spray tested to over 1,000 hours
- **Door/Gate Thickness:** Suitable for doors up to 80mm thick
- **Handle Type:** Flat bar lever (free-turning)
- **Usage:** Medium-to-heavy duty external use

Key Features

- **Double-Sided Security:** Keypads on both sides require code entry for both access and egress, ideal for securing garden gates.
- **Marine-Grade Protection:** Specialist MG Pro black finish provides exceptional resistance to harsh weather and coastal environments.

- **Anti-Vandal Handles:** Free-turning lever handles prevent damage from forced turning or misuse when locked.
- **Narrow Stile Compatibility:** The 28mm backset aluminium latch is perfect for narrow stile doors and timber gates.
- **Easy Retrofitting:** Shares the same footprint as the Borg BL2600 series for a quick and simple upgrade.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
