Specification Summary

Brand Borg digital locks

Product type Borg digital locks

Product Description

The Borg Locks BL2002 is a reliable, entry-level mechanical digital lock from the popular 2000 series, designed specifically for light-duty access control on narrow stile aluminium and timber doors. Fully mechanical and featuring a clean, simplistic design, this lock provides automatic locking upon closing, ensuring your premises remain secure until a correct code is entered.

This specific variant is equipped with a specialist 28mm aluminium latch, which is engineered to fit narrow stiles and features hardened steel pins alongside a separate anti-thrust pin for enhanced security. On the inside, the lock features a non-holdback paddle handle. This design ensures that the door always locks automatically when closed, while allowing free, immediate egress from the inside at all times without needing to enter a code.

With a robust keypad that has been cycle-tested to 50,000 operations and offers over 8,000 possible code combinations, the BL2002 is an ideal, low-maintenance solution for internal doors where unauthorised entry needs to be controlled.

Technical Specifications

- **Manufacturer:** Borg Locks
- **Model:** BL2002
- **Latch Type:** 28mm Aluminium latch
- **Backset:** 28mm
- **Inside Handle:** Non-holdback paddle handle
- **Combinations:** Over 8,000 potential code combinations
- **Cycle Testing:** Tested to 50,000 operations
- **Suitability:** Internal narrow stile aluminium and timber doors
- **Operation:** Fully mechanical keypad entry with free egress from inside

Key Features

- **Narrow Stile Design:** Specifically engineered with a compact 28mm latch to fit narrow stile doors.
- **Enhanced Security Latch:** Features hardened steel pins and a separate anti-thrust pin to resist tampering.

- **Automatic Locking:** Automatically locks upon closing to prevent unauthorised entry.
- **Free Egress:** Non-holdback inside paddle handle allows immediate exit at all times without a code.
- **Robust Performance:** Cycle-tested to 50,000 operations for reliable, light-duty access control.
- **High Code Security:** Offers over 8,000 unique code combinations for peace of mind.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
