Specification Summary

Brand Borg digital locks

Product type Borg digital locks

Product Description

The Borg Locks BL2021 is a high-quality, fully mechanical digital lock designed for light-duty access control. Featuring back-to-back keypads, this double-sided lock requires a code for both entry and exit, making it the perfect solution for controlling traffic flow in both directions. It is ideal for internal wooden or composite doors, such as office doors, partition walls, and restricted areas.

Each keypad operates with independent coding chambers, allowing you to set different codes for entry and exit if required. For added security, the lock features a patented load plate design to resist code-cracking attempts, alongside chemically treated internal components for enhanced durability.

The BL2021 comes with an anti-thrust tubular latch to prevent tampering. It is available with a choice of 50mm, 60mm, or 70mm backsets - please select your required latch size from the options below.

Technical Specifications

- **Series:** Borg BL2000 Series
- **Lock Type:** Fully mechanical pushbutton digital lock
- **Keypad Type:** Back-to-back (double-sided)
- **Latch Type:** Anti-thrust tubular latch
- **Available Backsets:** 50mm, 60mm, and 70mm (please select below)
- **Door Thickness:** Standard fixings suit doors up to 54mm thick
- **Handing:** Non-handed (easily reversible on site)
- **Cycle Rating:** Tested to 50,000 operations
- **Code Combinations:** Over 8,000 potential combinations per keypad
- **Holdback:** Non-holdback

Key Features

- **Double-Sided Access Control:** Back-to-back keypads require a code to enter and exit, providing secure traffic control from both sides.

- **Independent Coding:** Each keypad features its own coding chamber, allowing for identical or completely different codes on either side of the door.
- **Anti-Tamper Latch:** Equipped with an anti-thrust tubular latch to prevent unauthorized manipulation.
- **Enhanced Security:** Patented load plate design eliminates code-cracking attempts.
- **Durable Construction:** Internal components are chemically treated for extra strength, ensuring long-lasting performance.
- **Flexible Installation:** Fully reversible design makes it suitable for both left and right-handed doors.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
