Product Description

The BL2201 ECP is one of our entry level models making up the 2000 series range. Fully mechanical and with a simplistic design, the model provides automatic locking until such a time that the correct code is entered.

Separating the Easicode Pro range from the conventional locks is the patented “On the door” code change method. With this, the long and drawn out method of removing tumblers from the back of the keypad is over, cutting down what could be a 10-15 minute job to one that takes only 30 seconds.

This lock comes with a anti-thrust latch with over 4000 combinations, and is cycle tested to 50,000 operations and is suited for internal doors where unauthorized entry is risk.

This particular model comes fitted with a holdback function, allowing the door to be locked open for situations that demand free movement.

This keypad is ideal for light duty, access control solutions and is suited for internal wooden or composite doors.

## Brand Profile

Borg digital locks

**Borg** (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
