Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg Locks BL2202 ECP is a light-duty, fully mechanical digital keypad lock designed specifically for internal aluminium and narrow stile doors. As part of the popular 2000 series, this entry-level model offers a simplistic design combined with reliable, automatic locking upon door closure.

A standout feature of the Easicode Pro (ECP) range is the patented "on the door" code change method. Unlike conventional digital locks that require a tedious process of removing tumblers from the back of the keypad, the ECP system allows you to change the code in just 30 seconds without removing the unit from the door.

This model comes equipped with a specialist 28mm aluminium latch featuring hardened steel pins and a separate anti-thrust pin to prevent tampering. It also includes an inside paddle handle with a convenient holdback function, allowing the door to be held open when free, unrestricted passage is required. With over 4,000 possible code combinations and a cycle-tested design, it is an ideal access control solution for light-duty internal doors.

Technical Specifications

- **Series:** Borg 2000 Series (Easicode Pro)
- **Latch Type:** 28mm aluminium latch with hardened steel pins and anti-thrust pin
- **Inside Handle:** Paddle handle with holdback facility
- **Code Combinations:** Over 4,000 potential codes
- **Cycle Testing:** Tested to 50,000 operations
- **Suitability:** Internal narrow stile and aluminium doors
- **Operation:** Fully mechanical keypad

Key Features

- **Easicode Pro (ECP) Chamber:** Patented "on the door" code change method allows code updates in under 30 seconds without removing the lock.
- **Automatic Locking:** Provides automatic locking upon door closure for constant security.
- **Holdback Function:** Inside paddle handle features a holdback facility to keep the door unlocked for free passage when needed.

- **Specialist Latch:** 28mm aluminium latch is specifically designed for narrow stile doors and includes an anti-thrust pin to resist forced entry.
- **Light-Duty Access Control:** Simplistic, robust design ideal for managing access on internal doors.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
