**Specification Summary**

<b>Brand</b>	Borg digital locks
<b>Product type</b>	Borg digital locks

**Product Description**

The Borg Locks BL4402 is a medium-heavy duty mechanical digital lock specifically designed for external wooden and timber gates, as well as narrow stile doors. Part of the robust BL4400 series, this model combines a free-turning lever handle keypad with an inside holdback lever handle and a 28mm narrow stile aluminium latch (ali-latch).

Designed to withstand the harshest outdoor environments, the BL4402 features Borg's specialist Marine Grade Pro (MG Pro) black finish, which has undergone over 1,000 hours of salt spray testing. The free-turning external handle remains inactive until the correct code is entered, protecting the internal mechanism from forced entry and misuse.

Sharing the same footprint as the BL2600 series, the BL4402 serves as an ideal medium-heavy duty upgrade. It is fully non-handed for easy on-site reversibility and comes complete with a fixing kit suitable for gates and doors up to 80mm thick.

**Technical Specifications**

- **Series:** Borg BL4400 Series
- **Model:** BL4402
- **Finish:** Marine Grade Pro (MG Pro) Black
- **Latch Type:** 28mm backset narrow stile aluminium latch (ali-latch)
- **Keypad Type:** Single-sided keypad with free-turning lever handle
- **Inside Handle:** Lever handle with optional holdback function
- **Gate/Door Thickness:** Fits up to 80mm thick
- **Handing:** Non-handed (fully reversible on site)
- **Code Combinations:** Over 8,000 possible combinations
- **Salt Spray Tested:** 1,000 hours

**Key Features**

- **Marine Grade Protection:** Coated in a specialist MG Pro black finish and salt spray tested for over 1,000 hours to survive harsh external conditions.

- **Heavy-Duty Upgrade:** Shares the same footprint as the BL2600 series, providing a robust, medium-heavy duty lever handle upgrade.
- **Clutch Protection:** Free-turning external lever handle prevents forced entry and protects the internal mechanism from damage.
- **Narrow Stile Latch:** Supplied with a 28mm backset aluminium latch, making it ideal for narrow stile doors and gates.
- **Optional Holdback:** Inside lever handle features an optional holdback function for convenient, unrestricted access when required.
- **Weather-Resistant Fixings:** Supplied with a complete kit of weather-resistant fixings suitable for timber gates up to 80mm thick.

## Brand Profile

Borg digital locks

**Borg** (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
