## Product Description

The Borg Locks BL5201 Marine Grade Pro Digital Lock (BL5201MG) is a medium-to-heavy-duty mechanical keypad lock designed specifically for demanding marine and outdoor environments. Engineered to withstand the harshest conditions, this lock has undergone rigorous salt spray testing for over 1,000 hours and cycle testing to 100,000 operations, making it an ideal choice for applications where ISPS (International Ship and Port Facility Security) compliance is required.

This non-handed, fully reversible digital lock features a robust clutched handle mechanism that protects the internal components from damage caused by forced entry attempts. It is equipped with 12 large, indented buttons for ease of use, making it suitable for DDA (Disability Discrimination Act) compliant installations. For added convenience, the BL5201MG includes an optional free passage function, allowing the lock to be bypassed when unrestricted access is needed.

With a durable black Marine Grade Pro finish, a standard 60mm latch, and over 2,000 potential code combinations, this lock offers reliable, keyless security for gates, marine vessels, and external doors.

## Technical Specifications

- **Backset:** 60mm
- **Required Case Depth:** 84mm
- **Door Thickness:** Up to 80mm
- **Spindle:** 8mm square spindle
- **Finish:** Black (Marine Grade Pro)
- **Handing:** Reversible (non-handed)
- **Keypad Buttons:** 12 large indented buttons
- **Code Combinations:** 2,000+
- **Operation Outside:** Lever handle on entry of correct code
- **Operation Inside:** Lever handle with free exit
- **Latch:** 60mm standard tubular latch
- **Weight:** 2.5kg
- **Width:** 48mm
- **Guarantee:** 1 Year

## Key Features

- **Marine Grade Durability:** Salt spray tested for over 1,000 hours and cycle tested to 100,000 operations to withstand the toughest coastal and outdoor environments.
- **ISPS Compliant:** Specially designed for marine applications requiring compliance with the International Ship and Port Facility Security Code.
- **Clutched Handle Protection:** Features a clutched lever handle to prevent damage to the lock mechanism from forced entry attempts.
- **DDA Friendly:** Designed with 12 large, indented buttons and a lever handle, making it suitable for DDA-compliant installations.
- **Free Passage Mode:** Includes an optional free passage function to allow unrestricted access without entering a code when required.
- **Weatherproof Design:** High-grade construction with a specialized black finish for superior weather resistance.

## Brand Profile

Borg digital locks

**Borg** (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
