Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg Locks BL5403 is a robust, medium-to-heavy-duty mechanical digital keypad lock designed for high-traffic environments. It features a modern flat bar lever handle on both the keypad and the inside unit, providing a comfortable grip and reliable operation. Supplied complete with a 60x72mm euro-profile lockcase (60mm backset), this lock is ideal for installation on timber, composite, and steel doors in both internal and sheltered external locations.

Engineered for security and durability, the BL5403 features a clutched keypad handle to prevent damage from forced entry attempts. It also includes an optional free passage mode, allowing you to temporarily bypass the coding mechanism for unrestricted entry and exit when required. The unit is non-handed and fully reversible on-site, making installation straightforward.

This digital lock is available in a range of high-quality finishes, including Polished Brass, Polished Chrome, Satin Chrome, and Satin Stainless. Please choose your preferred finish from the options below.

Technical Specifications

- **Lockcase:** 60x72mm Euro-profile lockcase (60mm backset)
- **Handle Type:** Flat bar lever handle
- **Handing:** Non-handed (fully reversible on-site)
- **Usage:** Medium to heavy-duty internal and sheltered external doors
- **Door Compatibility:** Timber, composite, and steel doors
- **Keypad:** Single-sided with 12 large indented buttons
- **Code Combinations:** Over 2,000 possible combinations

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management** - for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
